

TV & IPAD Stand Assembly Instructions

Each pole includes numbered stickers corresponding to the diagram below.

1. Expand aluminum frame poles, securing push-buttons.
2. Connect all aluminum poles to assemble frame, making sure screw holes for brackets and literature rack face forwards.
3. Find the holes in the fabric graphic where the monitor bracket, tablet holder, and literature racks attach to the frame.
4. Slide fabric graphic onto unit, starting from front, down to the bottom, then to the top of the back panel. Pull tight to align with the holes on the frame, then zipper to secure in place.
5. Refer to instructions on mounting kit to attach TV brackets to your monitors with spacers and screws. Carefully hang monitor onto brackets.
6. Screw the literature racks through the fabric graphic holes to the frame using a screwdriver.
7. Insert end of the tablet bracket piece into the other piece. Press down the locking tab to secure. Attach the rotating ball joint to the back of the bracket.
8. Insert screw post through slot on back of aluminum pole through to the front. Place tablet bracket onto screw post, then tighten post completely using screwdriver to lock position.
9. Reinsert your tablet into the bracket and slide to fit your tablet. Press down the locking tab to secure. Adjust final rotation and position of bracket as desired.
